

Office 365 SharePoint Online

Collaboration Software for all

Microsoft Partner
Silver Small and Midmarket Cloud Solutions

What is Office 365 SharePoint Online?

SharePoint Online delivers the powerful features of SharePoint Server...without the cost of managing it yourself.

Traditional SharePoint Server infrastructure can be costly and time-consuming to manage. With SharePoint online, you can enjoy all of the benefits without needing to worry about what's going on in the background. With flexible management options, you can ensure that you still retain the control you need...including compliance requirements.

You can purchase SharePoint Online as a standalone subscription, or even better, if you have an existing Office 365 for Business subscription...it's included!

What are the benefits of SharePoint Online?

Cross-Device Availability

Easily access and interact with your SharePoint newsfeed wherever you go...using the SharePoint mobile apps available across various devices, including iOS and Android.

Easy to Manage

You can get set up in virtually no time! The powerful admin console allows SYS3 to easily manage capabilities, policies, and security for all the content and features within SharePoint. Automated maintenance of Microsoft SharePoint servers ensure that you are always up to date with the latest features with minimal downtime.

Enterprise Grade Reliability and Standards

Safeguard your data by hosting it in Microsoft's geographically distributed datacentres with premier disaster recovery capabilities and a team of experts monitoring the servers around the clock.
